KANISHK PRASAD

4th-year Computer Science student specializing in Full-Stack Development and Backend Engineering

+919310656821 kanishkprasad6@gmail.com LinkedIn GitHub New Delhi, India

PROFESSIONAL SUMMARY

4th-year CS student (Exp. 2027) focused on **Backend Engineering** and **Applied AI**. Experienced in delivering **scalable web applications** and developer tools using **Python, FastAPI, and React**. Passionate about **AI integration**—currently building a custom RAG data pipeline—backed by proficiency in **Linux** and secure **DevOps workflows**.

EDUCATIONS

GN Group of Institutes | Greater Noida, India — Sep 2023 - Present
Bachelor of Technology in Engineering

PROJECTS

GroundWork CLI | Website Github — Apr 2026 - May 2026
Solo Developer

- Built and published an interactive **CLI tool to PyPI** that lets developers practice fixing real-world cybersecurity vulnerabilities (CVEs) directly in their terminal.
- Powered the CLI with a decoupled **FastAPI REST backend** hosted on Hugging Face, utilizing **Docker for deployment** and implementing IP rate limiting to ensure reliable, secure API traffic.

Technologies / Tools Used : *Python, FastAPI, Docker, PyPI, Hugging Face*

Amazon Price Tracker | Website Github — Jan 2026 - Feb 2026
Solo Developer

- Engineered a full-stack **consumer tool** to track online product prices and automate drop alerts, utilizing a **React/TypeScript** frontend and a **FastAPI** backend.
- Developed a robust backend for web scraping and background task queuing using **PostgreSQL** and **Redis**, alongside an intuitive **React** frontend with interactive data visualizations.

Technologies / Tools Used : *FastAPI, React, TypeScript, PostgreSQL, Redis, Web Scraping*

MarketPulse Dashboard | Website Github — Nov 2025 - Dec 2025
Solo Developer

- Developed a **real-time financial dashboard** using **Python** and **Streamlit** to aggregate and visualize stock market trends, commodity prices, and currency exchange rates.
- Integrated multiple **REST APIs** and web scrapers for live data fetching.
- Optimized load times and reduced API costs by **caching historical data** in **MongoDB**.

Technologies / Tools Used : *Python, Streamlit, Pandas, MongoDB, REST APIs*

SKILLS

Databases :	PostgreSQL, MongoDB
Frameworks & Libraries :	FastAPI, Django, React.js, Flutter
Languages :	English, Hindi
Programming Languages :	Python, JavaScript, SQL, Dart
Tools & Platforms :	AWS, Docker, Git, Github, Postman, Linux, CI/CD
